- Creating the project structure and choosing the right technologies for building the app
- Tracking the work of 3 full stack developers, giving them tasks, goals, and deadlines
- Giving a helping hand everywhere in stack depending on the problem at hand
- Worked with all other teams in the company to ensure im in tune with everything that is going on. Mostly marketing and sales

CAREER OBJECTIVE

In my career i would like to be part of creating software that will change people's lives for the good. I want to be the part of the process of abstracting complex programming stuff in the back and presenting clean UI to the users. Also, i want to work on the widest range of software and help new people find their way in the world of software development.
